Piso Ciudad Universitaria
Villa, Obregon, D. F.
Mexico

Dear Dr. Lopez:

The Society of Exploration Geophysicists is an organization dedicated to the advancement of the science of geophysics and the art of geophysical prospecting. Through its journal, GEOPHYSICS, it supplies a medium for the dissemination of new knowledge in these fields.

One of the services performed by the Society is an annual survey of geophysical activity in the world comprising both mining and petroleum prospecting. For the mining industry, a questionnaire is mailed each March to all organizations that are engaged in mining geophysical exploration and/or research. The results of this survey are analyzed and subsequently published in GEOPHYSICS.

This year, in preparation for the 1962 survey, we are trying to improve and expand our mailing list so that better coverage of mining geophysical activity in the world can be obtained. Enclosed is our current mailing list for your area. You would be performing a great service to the Society if you would review this list for accuracy by making corrections, additions, and deletions as appropriate. Coverage of all airborne and ground geophysical activity in mining applications, exclusive of petroleum, is desired. The names of individuals, mining companies, contractors, universities, and government institutions that may have done mining geophysical research and/or exploration in 1962 would be welcome.

Your assistance in this matter and the return of the corrected list at your earliest convenience will be greatly appreciated.

Sincerely yours,

Charles L. Elliot
